Subject: Some thoughts about CREP

Paul and Mark: At the last Commission meeting I tried to express my concerns with the ways in which the Commission distributes funds using procedures determined by potential recipients. I think also that, in the case of CREP, especially as the program comes up for renewal, we need to get our act together so that the program can be presented as the success it is and is supported by the agencies that have responsibility and/or interest. The attached which I hope you will read and treat as it is meant not as a final position but as input for you to consider as we move ahead.

I will attend the Sept 7 meeting. It seems to be in the form of a town meeting of all who wish to attend and can be useful in identifying options, needs and areas where policies are needed. But as I have indicated in the attached, it doesn't seem constituted to do the jobs that I think are needed.

Be of good cheer. Bob
